"Be the change that you want to see in the world."

Recruitment Team

Dear Mr./Ms./Dr. HR,

About Me

As a Full Stack MERN developer with over **1.5** years of experience, I have a solid grasp of both front-end and back-end development. I have successfully designed and implemented new features for web applications using MongoDB, Express.js, React.js, and Node.js, as well as ensured their quality and performance through manual and automated testing. I have also worked with various technologies and tools, such as JWT, csrf's, state management libraries for React.js, Tailwind css, typescript, etc. Besides my Bachelor of Technology in Mechanical Engineering, I have also received training in MERN stack from Great Learning and completed a mern stack internship at Wipro.LTD. Furthermore, I have obtained certifications in ReactJS, Responsive web designs, web developer bootcamp, etc.

Why You?

I am drawn to your company because of its reputation for fostering innovation and encouraging continuous learning. I am particularly excited about the opportunity to work with a team that values the MERN stack as much as I do. I believe that your company's values align with my own, particularly in the areas of quality, integrity, and teamwork. I am excited about the opportunity to contribute to your ongoing projects and to learn from the talented individuals in your team.

Why Me?

With my technical skills and team management experience, I am a unique and qualified candidate for this role. I have extensive experience in the MERN stack, developing and testing web applications using various tools and frameworks. I have designed and implemented features for web applications, served as a Scrum Master, and participated in team meetings. I always review designs before code and test them along as I build features within web applications, ensuring no bug escapes my keen eye. I have also designed and implemented Java-selenium hybrid automation testing frameworks for various websites. I have a vast variety of skills and I am always open to work in any skill required and eager to learn new things. Moreover, my ability to manage a team effectively and contribute valuable insights to project planning and strategy discussions would be a great addition to your company.

Sincerely,

Hemant Kumbhar
