“Be the change that you want to see in the world.”

Recruitment Team

Dear Mr./Ms./Dr. HR,

About Me

As a Full Stack MERN developer with extensive experience, I have a solid understanding of both front-end and back-end development. I have successfully designed and implemented features for web applications using MongoDB, Express.js, React.js, and Node.js. My focus on quality and performance includes extensive manual and automated testing. I am skilled in various technologies and tools, including JWT, CSRF protection, state management libraries for React, Tailwind CSS, and TypeScript. I hold a Bachelor of Technology in Mechanical Engineering and have completed specialized training in the MERN stack from Great Learning, alongside an internship at Wipro Limited. Additionally, I have obtained certifications in ReactJS, responsive web design, and full-stack development.

Why You?

I am attracted to your company due to its commitment to innovation and continuous learning. The opportunity to work with a team that prioritizes the variety of technical stacks resonates with my professional values. I appreciate your company's focus on quality, integrity, and teamwork, and I am eager to contribute to your projects while learning from your talented team.

Why Me?

With my technical expertise and experience in team management, I am a strong candidate for this role. I have a proven track record in developing and testing web applications, serving as a Scrum Master, and actively participating in team discussions. I prioritize reviewing designs before coding and incorporate thorough testing throughout the development process to ensure high-quality outputs. My experience also includes designing Java-Selenium hybrid automation testing frameworks. I am adaptable and always open to learning new technologies. My ability to manage teams effectively and contribute valuable insights during project planning would make me a great addition to your company.

Sincerely,

Hemant Kumbhar
